OBJECTIVE

Having developed software for over 20 years my perfect position would place me in a team-lead or project manager for a group of developers where my skills and knowledge can be used and enhanced to the fullest.

SOFTWARE DEVELOPER

Talented, result-producing Software Developer with a proven record of accomplishment in hectic work environments. Creative, highly organized candidate; expert in the design, development, and delivery of cost-effective, high-performance technology solutions. Extensive qualifications in all facets of project lifecycle development. Proven ability to integrate out-of-the-box thinking and problem-solving analysis to improve processes, systems and methodologies. Expertise in Visual Basic.Net (2005/2008/2010) focused on data-driven applications both on LAN and WAN's (SQL/SQL Mobile). Solid leadership skills; able to build and guide top-performing teams. Adept at communicating with management as well as colleagues to ensure projects are moving ahead as planned.

- Team lead, project manager
- Software Development VB6/Visual Studio 05-2013
- Telerik RAD WinForms Controls (2015)
- Software Deployment (SMS)
- Software Configuration
- Application (Re)packaging (silent installs)
- SQL Server 2000-2014/Mobile
- Desktop Engineering (hardware/software)

PROFESSIONAL EXPERIENCE

Software Developer

May 2018 – Present
FunchTech, Fernandina Beach, FL

Developed a complete vacation reservation system for a local company with an SQL backend, written in aspx.net with Ajax and java script.

Software Developer

November 2015 – May 2018
Bank of America, Jacksonville, FL

Due to government regulation a large amount of web applications built in ASP and ASP.Net, needs to be remediated to conform.

Main duties are to manage projects, analyze, convert, code and test on 2003 and 2008 IIS servers as well as document the changes and create test-plans for third party testing. DB2/SQL backend.

Developed Automatic XML driven applications for auto provisioning of entitlements.

...Continued...

*Professional Experience Continued***Software Developer**

October 2014 – November 2015
Swisher, Jacksonville, FL

Company have a large amount of Microsoft Access databases that are getting too large and are now to be re-written in Visual Basic.Net 2013 utilizing Telerik RAD Controls for WinForms and with SQL 2014 backend. We are using Visual Studio reporting services for all reporting. Writing a Vendor Managed Inventory system for handling our biggest clients inventory, SQL 2014 backend, SQL Reporting Services.

Software Developer

February 2014 – October 2014
Email Marketing, Chicago, IL (Telecommute)

Develop, re-write and maintain a system to verify email marketing before sending out. In addition a two-step login verification process and encryption module. Tools used are asp.net using VB.Net and C# against an SQL database. The application support both internal users who connects authenticating with AD and external users connecting with login/password.

Software Developer

March 2010 – May 2014
Aetna, Jacksonville, FL

Senior developer building and maintaining in-house applications for the healthcare industry using vb.net with SQL Server back-end as well as mainframe applications and Crystal Reports. Projects have included claim-audit solution and special customer management where precision and reliability is essential. The projects include Crystal Reports and SQL views/stored procedures. All projects has financial importance, so perfection and accuracy is crucial to ensure correct amounts and payouts.

Software Developer

May 2006 – November 2009
Nassau County Sheriff's Office – Yulee, FL

Team lead for the Development team who developed and maintained a suite of applications for the fleet of cars giving them Report-writing, Messaging, Dispatch Calls, Alerts and various information-search capabilities as well as monitoring and returning GPS location for each unit. Connections are made through either a wireless connection when close to their headquarters or through GPRS/3G making a seamless transition when moving around. The applications are built based on input from users as well as mandated changes from local or state agencies. In addition, I have developed several applications for various departments including Evidence tracking for high-profile evidence inventory (Guns, Drugs and Money), Some use of Crystal Report but mostly customized reports, Employee Database with RFID Badge Printing, Fleet Management and Investigation Report Writing. The applications were developed so that they can be used in-house as well as in a car or remote locations. In addition I trained the officers, on the use of these systems. Technologies used: Telerik controls.

Senior Analyst

May 2000 – May 2006
Morgan Stanley, New York, NY

Developed, configured and deployed enterprise wide applications such as Adobe Acrobat Pro/Reader, Documentum, Microsoft Office, Google Desktop products on 47000+ workstations worldwide. Setting enterprise standards for software configuration while keeping business units' individual needs in mind.

Automating Morgan Stanley's Exchange installation, on Branch and Cluster servers, automating the implementation and minimizing the number of human errors. Technical lead for MSI (Windows Installer) project and part of the Microsoft Office and Windows OS implementation group. Heavily involved in customizing Office 2003 and Outlook, responsible for Business Unit specific versions of Microsoft Office. Developed several tools in VB 6 and VB.Net, to help deployment and configuration, working closely with the end-user to reach a perfect result based on their requirements.

Selected Contributions:

- ✓ Successfully deployed difficult applications like Acrobat pro and Documentum to more than 47.000 desktops worldwide with very little impact to the business in a very short time.
- ✓ Working with departments worldwide to minimize impact during trading hours.
